# PROJECT NAME

Member 1, Member 2, Member 3, Member 4, Member 5

Project Description

One paragraph description of your project. Example: We created a hospital management system such that … Using our system, doctors will be able to … Patients will be able to …

Entity-Relationship Diagram

Relational Database Design

Here, copy-paste the CREATE TABLE statements you used to create each of your tables.

Data Sources

Explain how you populated your database, i.e., where did you get your data? How many tuples exist in each of your tables?

Advanced SQL Queries

Your 5 complex SQL queries: copy-paste the queries here, explain briefly what they do, why are they useful in your project, where have they been integrated in your prototype.

Screenshots

Add a few screenshots from the finalized version of your prototype. You can also choose to upload a short video recording (screen capture).
